## **36 Watt Solar Powered Starbrite LED Fixture**

This is our 36 watt Starbrite LED fixture with a 90 degree beam and equipped with 24 volt DC input. It is mounted on a 20 foot pole that illuminates a remote pumping station. It's powered by a 180W solar panel connected to a 24 volt battery. The panel has a photocell to turn on the light from dusk until dawn and provides ample light for the station even in harsh conditions.
